Tier 2 — HIGH RISK

62 findings total · 62 HIGH

Top Findings

[PACT-004] HIGH

/2010-04-01/Accounts/{AccountSid}/SIP/IpAccessControlLists/{IpAccessControlListSid}/IpAddresses/{Sid}.json
POST /2010-04-01/Accounts/{AccountSid}/SIP/IpAccessControlLists/{IpAccessControlListSid}/IpAddresses/{Sid}.json accepts no Idempotency-Key header. Network retries or agent replays can create duplicate resources or apply the same mutation more than once without any safeguard.

[PACT-004] HIGH

/2010-04-01/Accounts/{AccountSid}/SIP/Domains/{DomainSid}/Auth/Registrations/CredentialListMappings.json
POST /2010-04-01/Accounts/{AccountSid}/SIP/Domains/{DomainSid}/Auth/Registrations/CredentialListMappings.json accepts no Idempotency-Key header. Network retries or agent replays can create duplicate resources or apply the same mutation more than once without any safeguard.

[PACT-004] HIGH

/2010-04-01/Accounts/{AccountSid}/SIP/Domains/{DomainSid}/Auth/Calls/IpAccessControlListMappings.json
POST /2010-04-01/Accounts/{AccountSid}/SIP/Domains/{DomainSid}/Auth/Calls/IpAccessControlListMappings.json accepts no Idempotency-Key header. Network retries or agent replays can create duplicate resources or apply the same mutation more than once without any safeguard.

Full Findings — Grouped by Rule

PACT-004 — IdempotencyMissing (HIGH)

Path	Method	Severity
/2010-04-01/Accounts.json	POST	HIGH
/2010-04-01/Accounts/{Sid}.json	POST	HIGH
/2010-04-01/Accounts/{AccountSid}/Addresses.json	POST	HIGH
/2010-04-01/Accounts/{AccountSid}/Addresses/{Sid}.json	POST	HIGH
/2010-04-01/Accounts/{AccountSid}/Applications.json	POST	HIGH
...and 57 more		

Guardrail: Add 'Idempotency-Key' as a required request header. The server must store the key and return the original response for duplicate requests received within a reasonable window.

Manual Review Required

- **model_compatibility_range:** Cannot be inferred from the spec. Depends on model capabilities, deployment context, and the desired trust level for this integration.
- **auto_detected_invariants.immutable_fields:** No readOnly properties found in component schemas. Manually list any fields that must never change after resource creation.
